 New group assignment

Your assignment title

ICS4U

Your assignment repository prefix

ICS4U

This will prefix each GitHub repository that is created for this assignment. May only contain alphanumeric characters, underscores or hyphens.

☐ Public

Submit assignments using public repositories. All submissions will be visible to the world.

☒ Private

Submit assignments using private repositories. Submissions will only be visible to the submitter and organization owners.

☒ Give students Admin permissions on their repository

☒ Enable assignment invitation URL

Add your starter code from GitHub (optional)

Search repositories

Maximum number of members in each team (optional)

1

Deadline (optional)

Unlimited free private repositories

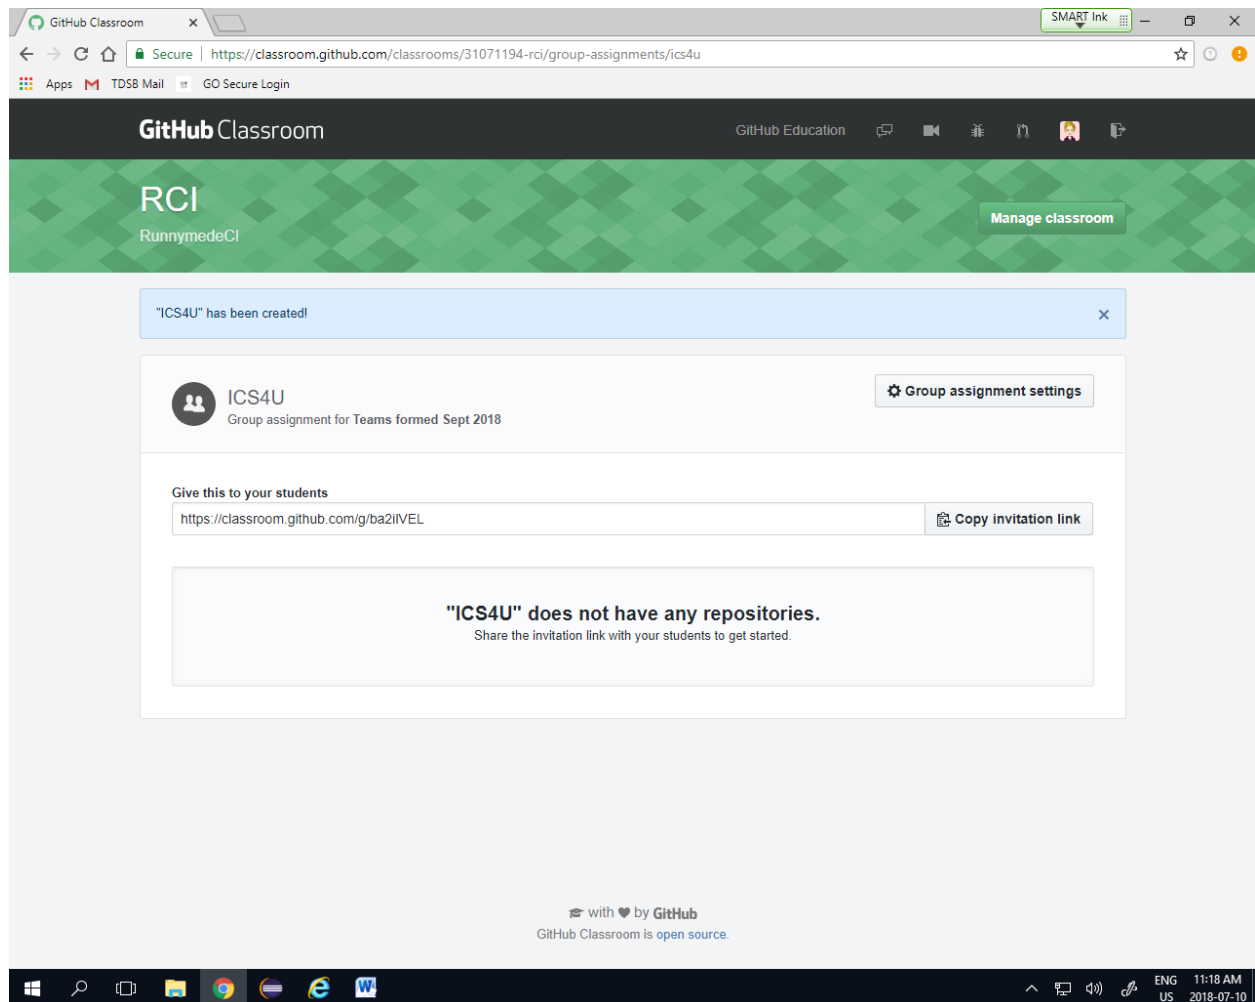

If you have not already, you may apply for unlimited free private repositories for this classroom organization [here](#).

After the deadline, GitHub Classroom will save the latest commit from each repo as a submission. Submissions

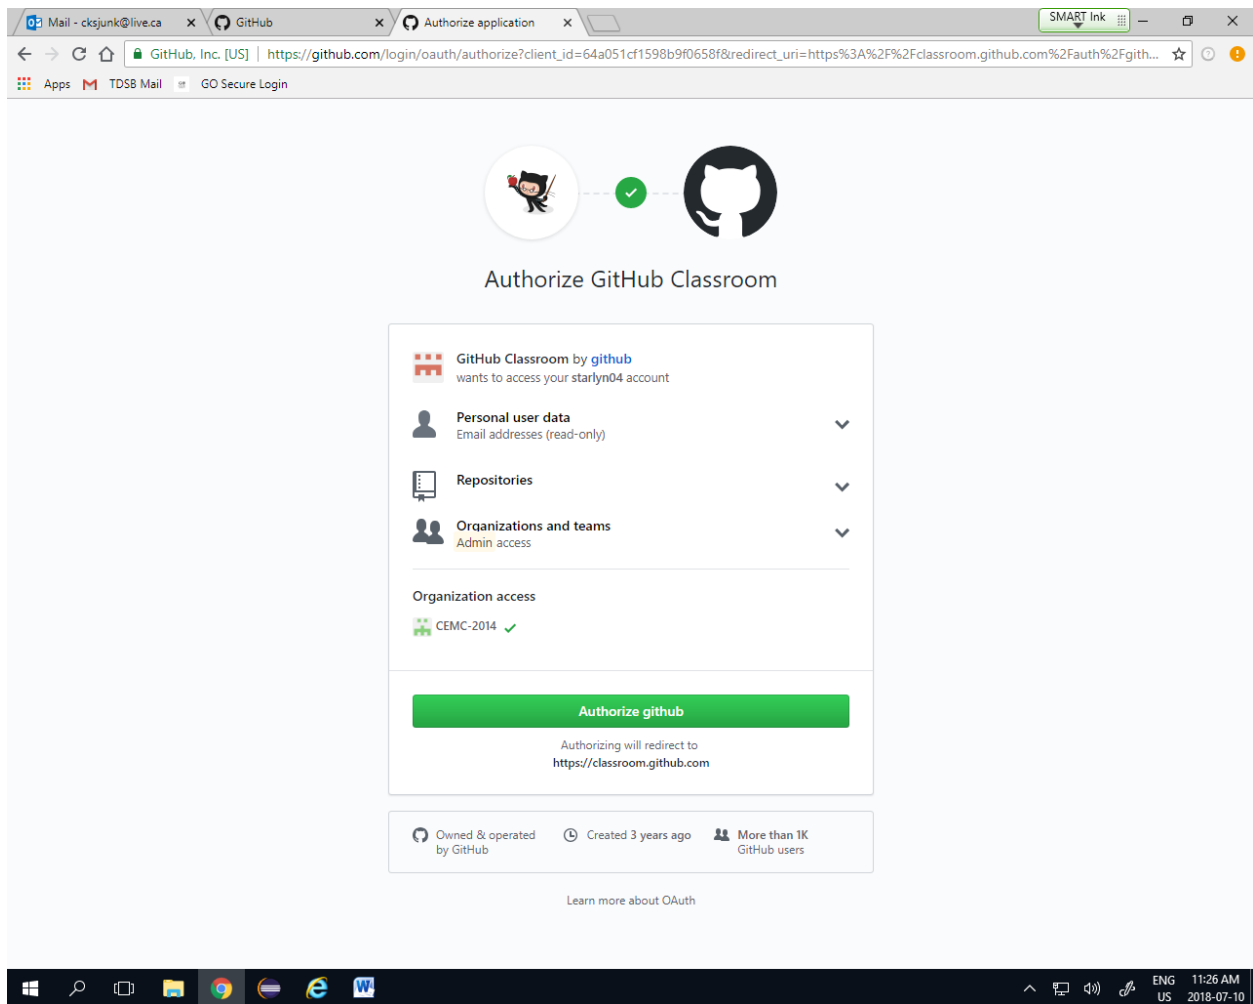

ENG 11:16 AM

US 2018-07-10

You now have a link to share with all of your students.

When students copy the link into their browser they will get a confirmation screen to allow the organization to have access to information in their github account.

Have the students enter their first and/or last name as the name of the team.

Quick setup — if you've done this kind of thing before

Set up in Desktop

 or

HTTPS

SSH

https://github.com/RunnymedeCI/ics3u-kemp.git

We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# ics3u-kemp" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/RunnymedeCI/ics3u-kemp.git
git push -u origin master
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/RunnymedeCI/ics3u-kemp.git
git push -u origin master
```

...or import code from another repository

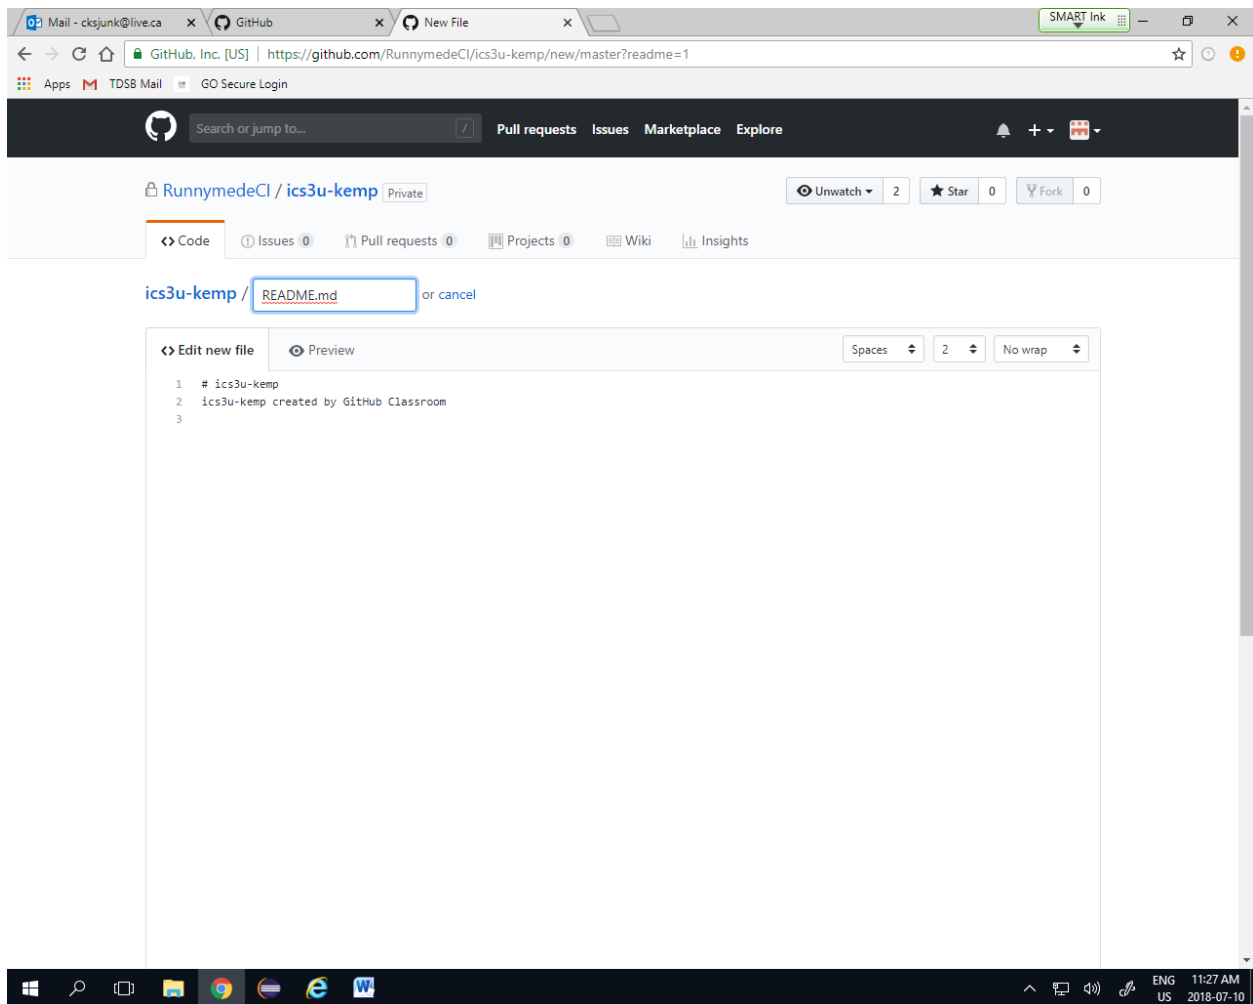

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

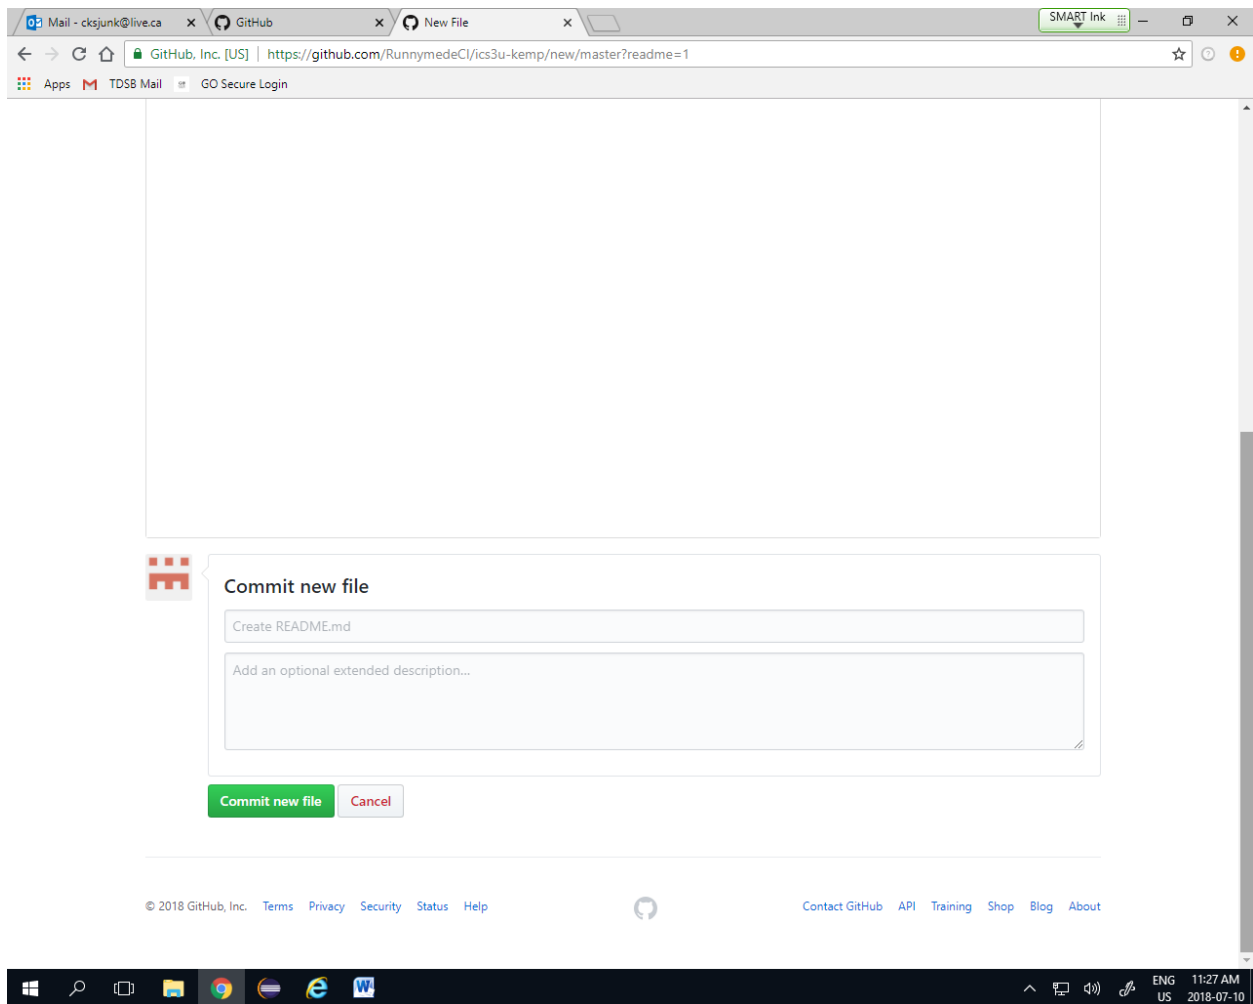

Import code

ProTip! Use the URL for this page when adding GitHub as a remote.

Windows Taskbar

System Tray

Now that they have their repository set up they can clone it into Eclipse (or whatever other software you are using).
